Forecast for Monday 24 Jul 2023

Weather: A broad area of cloud and rain will affect the park through the morning bringing rain, heavy at times, and drizzle. Becoming drier by late morning as this clears away to the southeast. A brighter afternoon with spells of strong sunshine follows and just the slight chance of a shower. Dry into the evening with sunshine perhaps turning hazy. Temperatures near normal but feeling relatively warm in the sunshine.

Chance of cloud-free hill tops above 600m: 20% initially, particularly towards the south. Rising to 80% or more by late-morning.

Low cloud and visibility: Low cloud expected widely this morning with bases around 400-500m, cloud bases lifting as rain clears to the southeast, rising above hills from mid-morning. Some patches of cloud may come and go across the highest tops until mid-morning. Poor visibility during the early rain and drizzle, improving to become very good by the afternoon with only slight deteriorations in any showers.

Meteorologist's View

Once rain clears, a fine day for walking, especially compared to the weekend. Given recent rainfall, ground may be well saturated or slippery underfoot and some watercourses swollen. High UV levels by the afternoon.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Tuesday 25 Jul 2023

Weather: A fine and bright day with lengthy sunny spells, especially during the morning. Cloud bubbling up through the day a chance of well-scattered showers. Dry by the evening with clear skies overnight. Feeling rather cool compared to average, but pleasant in the strong sunshine.

Maximum wind: Northwest 10-20 mph.

Chance of cloud-free hill tops 600m: 90% or more.

Low cloud and visibility: Some ragged patches of cloud may come and go across higher tops during the morning, but soon rising well clear of the highest peaks. Visibility very good, dropping slightly in any isolated showers.

Temperature: **Valleys:** Plus 10 rising to Plus 18 degrees Celsius.
At 600m: Plus 7 rising to Plus 11 degrees Celsius.
Freezing level: Above summits.
